Portfolio Overview

This document summarizes the visual production areas presented by PT Autotube Crew Studio. It is a capability overview rather than a list of named client case studies. Project descriptions, client names and outcomes should only be added when they are confirmed and approved for publication.

Selected Production Areas

Commercial CGI Digital imagery for advertising, promotional content and commercial visual communication.	**3D Environments** Environment creation for animation, games, cinematic work and digital experiences.
Product Visualization Product visuals with considered modeling, materials, lighting and presentation.	**Motion Graphics** Animated graphic content for promotion, presentations and digital media.
Visual Effects VFX and compositing to support cinematic, commercial and creative productions.	**3D Animation** Animation for storytelling, product communication and digital platforms.
Cinematic Visuals Visual development focused on atmosphere, composition, lighting and storytelling.	**3D Production** Modeling, texturing, lighting, rendering and visual development.
Digital Production Visual content for online communication, campaigns and presentation.	**Creative Visualization** Digital imagery developed to communicate concepts and creative ideas.

Production Disciplines

- Creative planning and visual direction
- Modeling, environments and digital assets
- Animation, lighting and rendering
- VFX, compositing and motion graphics
- Review, refinement and final delivery

Project-Specific Portfolio Use

For a project-specific portfolio or case study, include only verified project details, approved imagery and permitted client references. Confidential work and unreleased materials should not be shared without authorization.
