Creative Production Services

PT Autotube Crew Studio supports visual projects from creative development through production and final delivery. Services are scoped around the brief, schedule and intended use.

Services

CGI Production Computer-generated imagery, assets, environments, lighting and rendering.	**3D Animation** Product, environment and cinematic animation for campaigns and digital content.
VFX Compositing, CG integration, cleanup and visual effects as required.	**Motion Graphics** Animated titles, graphics and visual communication.
Product Visualization 3D product imagery and animation for marketing and presentations.	**Architectural Visualization** Interior, exterior and environment visualization.
Environment Art Digital environments and sets for visual productions.	**Video Production** Creative development, filming, editing and post-production when scoped.
Digital Content Visual content for online campaigns, social platforms and presentations.	

Production Stages

01 - Brief Clarify goals, audience, references, schedule and deliverables.	**02 - Plan** Set creative direction, production stages and review points.
03 - Produce Create the approved assets, footage, animation and effects.	**04 - Deliver** Refine approved work and prepare agreed final formats.

Project Deliverables

- Final video and image outputs
- Platform-specific versions and aspect ratios when included
- Animation, CGI, VFX or motion graphics assets as scoped
- Agreed review stages and final file formats

Working Together

The studio can work directly with clients or alongside agencies, brands, production companies and creative teams. Project scope, fees, schedule, revisions, usage rights and delivery specifications are confirmed in writing for each engagement.
