Brand Foundation

PT Autotube Crew Studio presents itself as a creative production studio based in Jakarta, Indonesia, focused on CGI, 3D animation, VFX, visualization and digital visual content.

Name and Description

Official Name	PT Autotube Crew Studio
Short Description	Creative production studio
Location	Jakarta, Indonesia
Primary Focus	CGI, 3D animation, VFX and digital visual production

Logo Use

- Use the supplied logo asset: logo.png.png.
- Keep the original logo proportions; do not stretch, skew or distort it.
- Do not recolor the logo or add effects unless an approved variant is provided.
- For the website header, a cropped display can hide the lower tagline while leaving the original image file unchanged.
- For documents and external materials, use the full original logo unless a separate approved logo version is supplied.
- Keep sufficient clear space around the logo and use it on a background with good contrast.

Core Color Palette

Studio Black	#050505 - main background
Dark Surface	#111111 - cards and panels
Studio Red	#E50914 - accent and calls to action
White	#FFFFFF - primary text on dark backgrounds
Mid Gray	#AAAAAA - secondary text

Typography

The website uses Poppins for headings and body text. For documents where Poppins is unavailable, use a clean sans-serif substitute such as Arial or Helvetica. Keep headings clear and readable, and avoid using many type styles on the same page.

Visual Direction

- Use dark, uncluttered layouts with strong contrast.
- Use red as an accent rather than as a large background for all content.
- Choose visual assets that are relevant to the production topic.
- Keep spacing, image treatment and heading hierarchy consistent.
- Use approved studio images and do not imply client endorsement without permission.

Writing Style

- Describe services and project scope clearly.
- Use a professional, direct and creative tone.
- Avoid unverified client names, testimonials, awards, metrics or results.
- Do not promise fixed costs, timelines or deliverables unless agreed for a project.

Before Publishing

- Use approved studio assets and check that images are cleared for publication.
- Keep text readable and maintain strong contrast across digital and print formats.
- Confirm contact details and links before distributing materials.
- Request approval before implying a client endorsement or partnership.
